PIPELINE VALVE

Top -entry ball valve

ZHEJIANG BOTELI TECHNOLOGY CO.,LTD.

Brief Introduction

Zhejiang Boteli Technology Co., Ltd. is a specialized valve manufacturing enterprise, which integrates R&D, production and sales, wholly controlled by Boteli Valve Group. Covering an area of 96000 square meters, it has more than 700 employees. Equipped with a three-dimensional simulation manufacturing test design system, various processing centers, intelligent mechanical arms, CNC machine tools, plasma welding, ultra-frequency vacuum heat treatment equipment; it has established a valve performance inspection and test center with first-class testing capability, which has comprehensive testing capability of physical and chemical performance, high-low temperature, non-destructive testing, life test, torque, explosion-proof, micro-leakage, pipeline load test, strength, micro-leakage seal and so on.

As the digital factory production base of Boteli, it has a perfect information management system, making full use of the integration of industry and information technology to achieve intelligent production. It makes orders from incoming to after-sales service quality, accounting to achieve complete integration of the information and control, provides a strong support for open high-

end market at home and abroad.

Boteli as a national torch plan key high-tech enterprises, China's most growth enterprises, China national machinery industry 500 strong enterprise, zhejiang industry leading backbone enterprises, green enterprises in zhejiang province, zhejiang pump valve association unit, zhejiang patent demonstration enterprises, wenzhou industry leading enterprises, wenzhou large taxpayer, with perfect quality assurance system, certificated by IS09001, API-6D, CE, ISO14001, ISO45001, National special equipment manufacturing license (TS), ABS, CUTR, ATEX, etc.

Boteli always adhere to the brand construction, obtaining many honors such as the Chinese well-known trademark, the zhejiang province famous brand products, zhejiang famous trademark, well-known firms in zhejiang province. Supported by parent company, Zhejiang Boteli Technology co., LTD. has been the class a suppliers and vendor of CNPC, CPDC, Cnooc oil fields, refining, pipelines, storage and transportation sector framework, and has a high reputation in natural gas, chemical,

coal chemical industry, electric power industry.

In international markets, Boteli has also been approved by Honeywell Honeywell, GE g Gazprom, LUKOIL, Rosneft Oil, BASF, Petrobras, Columbia's state oil company, ENAP, EIL, PDO, ADCO, ATLA Scopco, South Korea Sk group, Petronas, etc.

Together with parent company, is always committed to relying on scientific and technological innovation and constantly applying new technologies, new processes and new materials to develop new products of high quality. In recent years, its research products such as ultra-low temperature valve, hydrogen-faced valve, pipeline ball valve, HP two-way sealing butterfly valve and Marine valve, have been widely used in various related industries. It is equipped with large cryogenic material test, cold processing, product performance testing, micro leak detection test measure, apply to -196°C ball valve, butterfly valve, gate valve, and other products have been widely used in the ethylene, air separation such as LNG, LPG project, at present, the company produces the product maximum size up to 48".

At the same time, equipped with the ultra high pressure

hydrogenation valve shell and seal high pressure gas testing equipment, it offers quality reliable safety valves. Products are batch used in hydrogen device in the petroleum and petrochemical industry, independent research and development of the mobile platform is special valve, operation of mobile platforms at sea and towing security plays a key role, and won two national invention patents, fill the gaps at home and abroad, the product has been successfully applied in cnooc offshore platform, Iraq offshore platform, etc.

Zhejiang Boteli Technology Co., Ltd. relies on scientific and technological progress, adheres to brand construction, and actively expands two markets at home and abroad, and achieves sustained, rapid and healthy development, which has been recognized by users at home and abroad. Stick to the development strategy of independent innovation and stick to scientific development. Seek improvement in stability strives to catch up with the world level, improve the brand competitiveness and influence, and achieve rapid development.

Production Equipment

"Science is regarded as the powerful historiclever and the revolutionary force with significance at the highest level." It is certain that with the continuous innovation of knowledge and rapid progress of science and technology, great changes have taken place in the world. In the economic field, scientific and technological innovation has become the leading force. Looking back to the development course of BTL, through endless scientific and technological progress and innovation, the enterprise is growing from small to big, from big to strong, moving towards the world from countryside, and has become a shiny star in the world industrial valve industry.

Scientific and technological innovation has become the core of current competition of international economy. With the increasingly sharp competition in the global market, to enhance the capacity of the enterprise in resisting various impacts of risks, the scientific and technological progress and innovation is a must for improving quality and benefits.

In a word, without scientific and technological progress and innovation, we cannot win in a new round of competition, and cannot maintain the continual and healthy development of the enterprise.

during the scientific and technological innovation, insisting on oriented by market demands,btl is increasing varieties, improving quality and enhancing benefit to further reform and promote the traditional industry of valve through high technology, as well as making all efforts to master core technology and to stand on the top of technology. furthermore, it is also accelerating the introduction, digestion and absorption of the latest technology results in world valve industry so as to intensify independent innovation ability. btl has now the foundation and ability for promoting development through technology. when learning advanced technology from abroad, it will never blindly follow others, or be too dependent on the existing technology from abroad, but carry out independent exploration and innovation to form unique features and competitive advantages of btl.

BOTELI is fully competent in mass production of the full series of API 6D ball valves and meeting the requirement of quality control, its fabrication facilities including:

- 4 Nos. of CNC Vertical Lathe with max. machining dia. 3000mm
- 10 Nos. of Machining Center with max. machining dia. 2000mm
- 3 Nos. of CNC Milling machines
- 3 Nos. of Turning–Grinding Integrated Machining Center of Steel Ball, which is capable of machining steel ball from. dia. 2000mm through dia. 4000 mm.
- 102 Nos. of various CNC lathes
- 8 Nos. of Automatic SAW Machine with Double Wire Nozzle, which is capable of welding ball valve of max. size 60" and max. weight 1000 Tons
- 3 Nos. of 3000Tons Pressure Test Bench with max. test pressure Class 2500 and max. ball valve size 60" .
- 4 Nos. of Cranes with lifting weight 50 Tons.
- 20m³ of 16.0MPa High Pressure Source

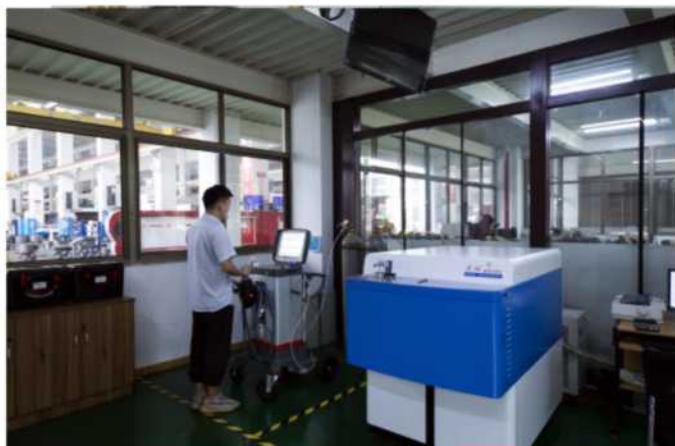

Quality Determines Survival

On the basis of strictly implementing ISO9001 Quality Management System, BTL also passed CE European Union Safety Certification in 2002. It passed American Petroleum Institute API-6D certification in 2003. It passed ISO14001 Environmental System Certification and ISO45001 Occupational Health and Safety Certification as well as National Pressure Vessel Safety Registration (TS) Certification in 2003, all of which pro-

vide Passport for the company to enter international market. BTL not only makes full use of domestic scientific research resources, but also employs first class technical talents from abroad. Through continuous improvement and development, it has formed complete quality control system, which provides reliable quality guarantee for "BTL manufacturing". From spare parts inspection, on-site inspection to

complete machine inspection, BTL implements quality control in every chain in inspection instruments, strictly controls The production. The BTL quality control center, equipped with first class inspection instruments, strictly controls every product to consistently carry out the "Fine Product" strategy.

Technical Features

BTL

STANDARD FEATURES	Type F	Type X	COMMENTS
Size range	2"FB up to 10" RB	10" FB up to 60"	Special sizes available on request
Pressure	ANSI150-2500	ANSI150-2500	
Top Entry body design	YES	YES	
Anti-static device	YES	YES	
Self relieving seats	YES	YES	
Double Piston Effect seats	YES(*)	YES(*)	
Primary metal to metal seal, secondary rotation with o-ring	NO	YES	
Plastic polymer insert on seat sealing	YES	NO	X-optional features(*)
Lubricated stem	YES	YES	
Lubricated seat	NO	YES	F-optional features(*)
Double block and bleed	YES	YES	Open/closed position
Metal to metal seats	YES(*)	YES(*)	
Trunion mounted ball	YES	YES	
Full or Reduced bore	YES	YES	
Bi-directional	YES	YES	
Stem anti-blow out proof design	YES	YES	
Stem extension	YES(*)	YES(*)	
N.D.T.verification on body casting (dye examination)	YES	YES	Other N.D.T.verification as per Ultrasonic examination or X-Ray(*)
N.D.T.verification on welding ends (dye penetrant)	YES	YES	According to ASME VIII Div.I
Minimum thickness ASME B16.34	YES	YES	
RF or RTJ flanges to ASME B16.5	YES	YES	Other flange design(*)
BW(butt-weld)ends to ASME B16.25	YES	YES	Other code for BW design(*)
Bore and end -to-end dimensions to API 6D	YES	YES	Dimensions other than API 6D(*)
Manufacture in accordance with API spec.6D/ASME B 16.34	YES	YES	
Materials certification to EN10204 type3.1B for pressure containing parts,ball,stem and seats	YES	YES	Type3.1.c materials certification level(*)
Fire safe design to API 6FA(BS6755Pt.2)	YES	YES	Other fire safe code(e.g.API607) (*)
Operation by gear, w/handwheel or actuator	YES	YES
